

# Tabs3 Performance Comparison

An article from Tabs3 Software

## Platinum Versus Multi-User Versions

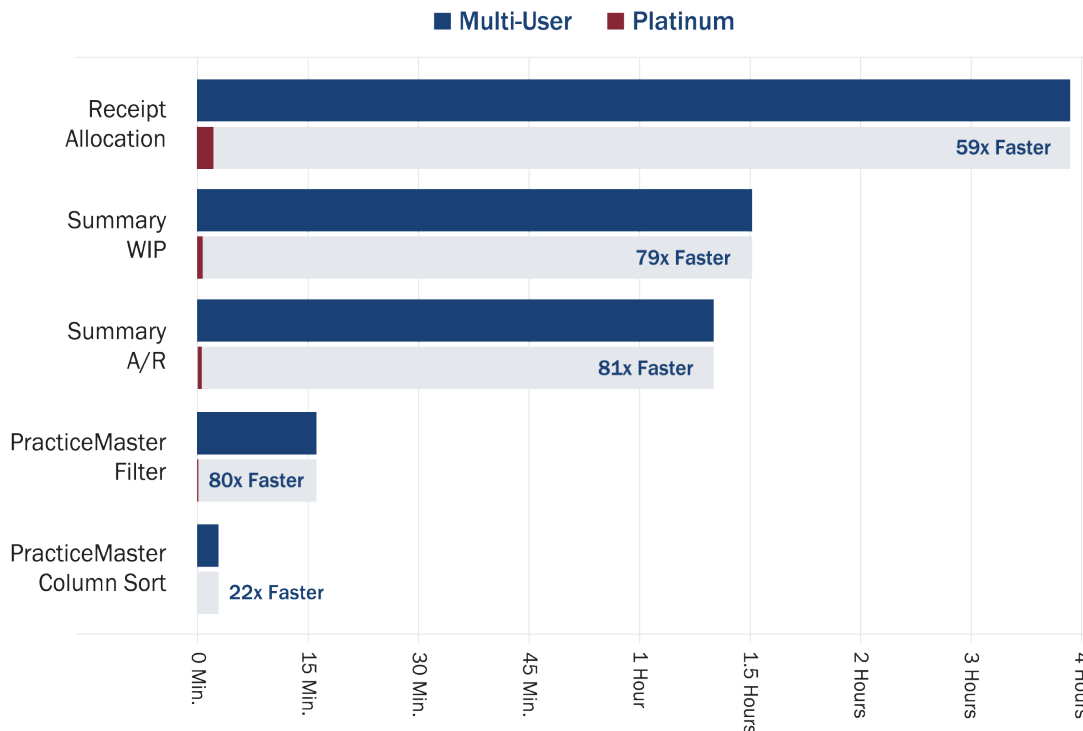

This document compares the performance of Tabs3 Platinum with Tabs3 Multi-User.

The Platinum versions of Tabs3 Billing and PracticeMaster typically run common reports 10 to 30 times faster than the Multi-User versions. Below is an example of how one firm runs reports even faster using Platinum.

For more information on Platinum, see KB article [R11379](#), or the [Platinum White Paper](#).

	Minutes		
	Multi-User	Platinum	Times Faster
Tabs3 Receipt Allocation Report	237.0	4.0	59
Tabs3 Summary WIP Report	78.8	1.0	79
Tabs3 Summary A/R Report	72.9	0.9	81
PracticeMaster Filter	16.1	0.2	80
PracticeMaster Column Sort	2.2	<0.1	22

*Times are for a data set containing 71,500 client records. More information regarding the testing process can be found below.*

*Results may vary. Numerous factors affect the reported performance including characteristics of the data, report options chosen, network driver performance, antivirus software, network loads, etc. Software Technology, LLC, cannot guarantee that these numbers are reproducible. Times are for a single report generated simultaneously with one other report. The data server had sufficient RAM to allow memory caching of all key data files.*
