Tabs3

Performance Comparison

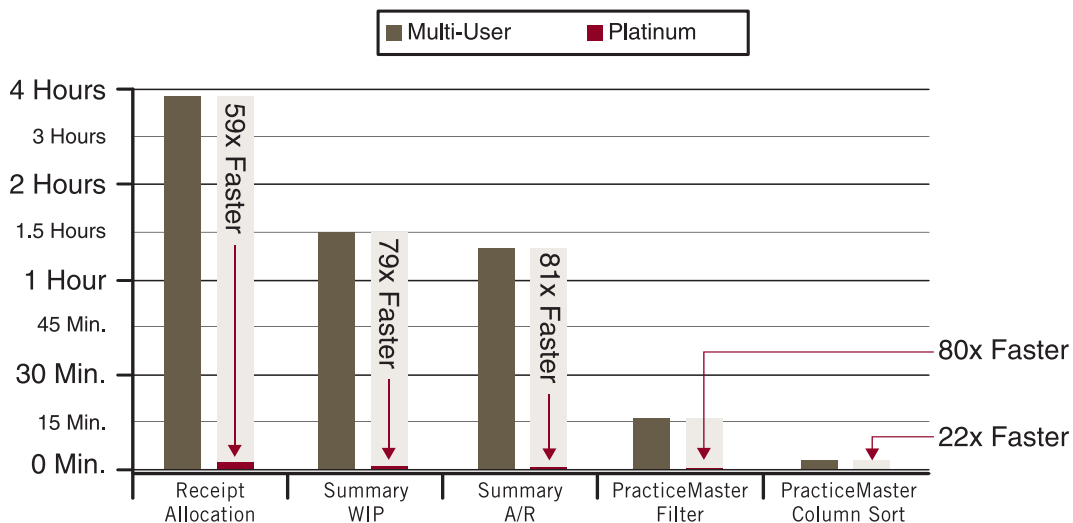

PLATINUM VERSUS MULTI-USER VERSIONS

This document compares the performance of **Tabs3 Platinum** with **Tabs3 Multi-User**.

The Platinum version of Tabs3 and PracticeMaster typically runs common reports 10 to 30 times faster than the Multi-User version. Below is an example of how one firm runs reports even faster using Platinum.

For more information on Platinum, see KB article [R11379](#), or the [Platinum White Paper](#).

	Minutes		
	Multi-User	Platinum	Times Faster
Tabs3 Receipt Allocation Report	237.0	4.0	59
Tabs3 Summary WIP Report	78.8	1.0	79
Tabs3 Summary A/R Report	72.9	0.9	81
PracticeMaster Filter	16.1	0.2	80
PracticeMaster Column Sort	2.2	<0.1	22

NOTES

Your results will vary. Numerous factors affect the reported performance including characteristics of the data, report options chosen, network driver performance, AntiVirus programs, network loads, etc. Software Technology, Inc., cannot guarantee that these numbers are reproducible.

The data in this document is current as of May 14, 2014.

Times are for a single report generated simultaneously with one other report.

The data set contained 71,500 client records.

The data server had sufficient RAM to allow memory caching of all key data files.

HARDWARE CONFIGURATION

Server: SuperMicro Xeon E5620, Quad Core, Hyper Thread, 2.4 GHz, 16GB RAM, Oplocks Enabled, Windows Server 2008 R2, Microsoft Forefront Endpoint Protection 2010

Workstation: Intel Q6600, Quad Core, 2.6 GHz, 5GB RAM, Windows 7 64-bit, Microsoft Forefront Endpoint Protection 2010

LAN: 1 Gbps link
