# Introduction & Getting Started

Tabs3 has partnered with LawPay® (an AffiniPay solution) to provide electronic processing of credit card and eCheck transactions in Tabs3 Billing Software and Tabs3 Trust Accounting Software (TAS) for payments and deposits.

Integration with LawPay gives you the ability to:

- Include a payment link when emailing statements.
- Authorize electronic payments in Tabs3 Billing Software.
- Authorize electronic client funds deposits in Tabs3 Billing Software.
- Authorize electronic deposits in Tabs3 Trust Accounting Software (TAS).
- Credit or void electronic transactions entered in Tabs3 and TAS.

LawPay allows you to link multiple bank accounts to your LawPay account. You can then assign these bank accounts to your firm, to separate locations, and to individual primary timekeepers or any combination thereof. This allows you to route payments and deposits to multiple bank accounts. Additionally, TAS allows you to link LawPay bank accounts to separate trust bank accounts.

LawPay accepts the following credit card types:

- Visa®
- MasterCard®
- Discover®
- American Express®

Additionally, LawPay accepts eChecks (directly debiting a checking or savings account using the automated clearing house [ACH] system) for Tabs3 payments and client funds deposits.

**Note:** LawPay does not accept eChecks for trust deposits in TAS at this time.

Once LawPay has been enabled and configured, you can include payment links with your email statements. These links allow clients to make payments online via a LawPay payment page using a credit card or eCheck. Payments can then be imported into Tabs3 using the Import Online Payments program.

Transactions can also be entered manually via the Payment Entry and Client Funds Entry programs in Tabs3 Billing and the Trust Transaction Entry program in TAS. You can specify an email address for each payment method, allowing the cardholder or client to receive a receipt for each transaction. You can also print or email a **Credit Card Transaction Receipt** (page 21) as needed. A **Credit Card**

**Authorization List** (page 24) provides a list of electronic transactions authorized via Tabs3 or TAS for a specified time period and can include charges, voids, credits, or any combination thereof.

LawPay integration is included with Tabs3 and TAS at no charge, but requires a LawPay account. Visit [Tabs3.com/LawPay](https://Tabs3.com/LawPay) to sign up for a LawPay account.

## Security

Tabs3 does not transmit or receive sensitive credit card or banking information directly. All transmission and storage of sensitive data is handled by LawPay. Tabs3 only stores the Credit Card Type and the last four digits of the credit card number or bank account number. Tabs3 does not store Credit Card Numbers, Expiration Dates, Security Codes (i.e., Card Verification Values of CVV, CW2, CVC2, or CID type), or PIN numbers.

## Requirements

To accept electronic payments in Tabs3 Billing or Tabs3 Trust Accounting Software, the following is required:

- The following software must be installed in order to use LawPay integration:
  - Tabs3 Version 2020 or later (for payment links, electronic payment transactions, and electronic client funds deposit transactions).
  - Tabs3 Trust Accounting Software (TAS) Version 2020 or later (for electronic trust deposit transactions).
- An account must be created with LawPay. The email address and password for the LawPay account will be used to enable integration with Tabs3.
- An Internet connection is required.

## Training Videos

You can view the following training video for more information. Clicking the link will open the training video in your browser. All training videos are also accessible in the software via the **Help | Training Videos** menu and at [Tabs3.com/video](https://Tabs3.com/video).

[Accepting Credit Cards Using LawPay](#)

# Configuration

This section will walk you through the steps necessary to configure Tabs3 Billing and/or Tabs3 Trust Accounting Software (TAS) for electronic payment processing using LawPay.

## Obtain a LawPay Account

In order to process electronic transactions in Tabs3, the firm must first obtain an account with LawPay.

For more information regarding LawPay integration with Tabs3 and TAS, please visit:

[Tabs3.com/LawPay](https://www.tabs3.com/LawPay)

This page can also be accessed by clicking the **Learn More** button on the **LawPay** tab of Tabs3 Customization (**Utilities | Customization**).

## Configuring LawPay Integration with Tabs3 Billing

Once LawPay Integration has been enabled in Tabs3, you can process credit card and eCheck payments electronically as well as send payment links with your Email Statements.

### ► To enable LawPay integration in Tabs3

1. Have all users exit the software.
2. From Tabs3, select **Utilities | Customization**.
3. Click the **LawPay** tab.
4. Click the **Enable LawPay** button.
5. A LawPay window will be displayed. Enter the email address and password assigned to your LawPay account and click the **Sign In** button.
6. If you are enabling LawPay for the first time, you will be prompted for a security code, which will be sent to the specified email address. Enter the security code and click **OK**.
7. Click the **Authorize** button to authorize Tabs3 Billing to connect to LawPay.
8. Click the  button to save customization changes.

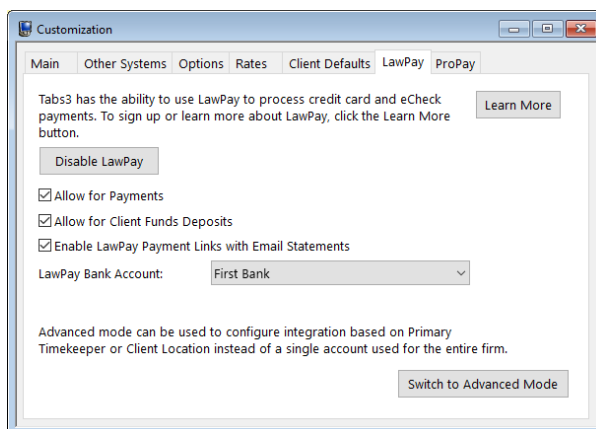

Figure 1, **LawPay** tab of Tabs3 Customization

By default, LawPay is configured to support payments, client funds deposits, and payment links for email statements. To disable one or more of these functions, clear the appropriate check boxes on the **LawPay** tab, then save and close the window.

The default configuration for LawPay integration is to deposit all funds received from electronic payments and client funds deposits to a single bank account associated with your LawPay account. If you have multiple bank accounts associated with your LawPay account, the first account will be selected by default. If you want to use a different account for all of your firm's LawPay transactions, you can select a different account in the **LawPay Bank Account** field. If you want to deposit LawPay transactions into separate bank accounts based on the client's assigned location or timekeeper, see the [Configuring Additional LawPay Accounts](#) section (page 4).

## Configuring Additional LawPay Accounts in Tabs3

Tabs3 automatically selects the first bank account associated with your LawPay account as the firm-level account. This account will be used for all LawPay payments and client funds deposits in Tabs3. If you want to deposit LawPay transactions into separate bank accounts based on location or timekeeper, you must configure additional accounts.

### ► To link a LawPay bank account to a location

1. Have all users exit the software.
2. From Tabs3, select **Utilities | Customization**.
3. Click the **LawPay** tab.
4. Click the **Add** button to open the LawPay Account Setup window. (Note: If you do not see an **Add** button, click the **Switch to Advanced Mode** button.)

- a. If you want to use a bank account associated with a different LawPay Account, select that LawPay account in the **LawPay Account** field and proceed to step b. If the other LawPay account is not present, you will need to enable it using the following steps:
  - i. Click the **Add new LawPay account** link.
  - ii. A LawPay window will be displayed. Enter the email address and password assigned to the new LawPay account and click the **Sign In** button.
  - iii. Click the **Authorize** button to authorize Tabs3 Billing to connect to LawPay.
  - iv. You may be prompted for a security code, which will be sent to the specified email address. Enter the security code and click **OK**.
  - v. Click the **Authorize** button to authorize Tabs3 Billing to connect to LawPay.
- b. In the **Use For** field, select **Location**. A Location Lookup window will be displayed. Select the location you want to associate with a LawPay bank account and click **OK**.
- c. In the **Bank Account** field, select the LawPay bank account you want to link to the selected location.
- d. Click **OK** to close the window.

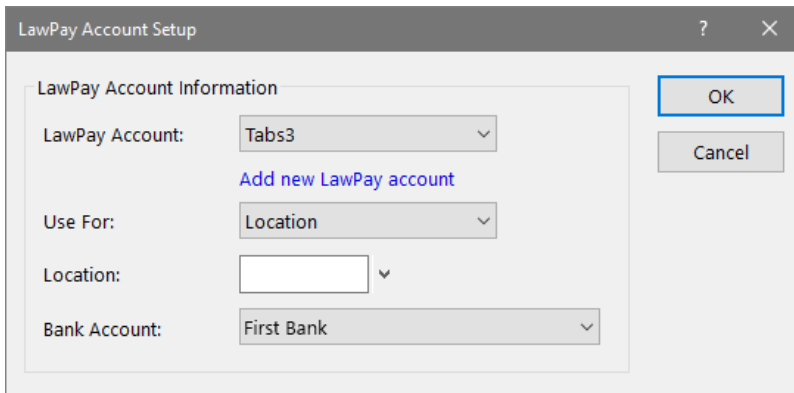

Figure 2, LawPay Account Setup Window (Location)

5. Save and close the Tabs3 Customization window.

► **To link a LawPay bank account to a timekeeper**

1. Have all users exit the software.
2. From Tabs3, select **Utilities | Customization**.
3. Click the **LawPay** tab.
4. Click the **Add** button to open the LawPay Account Setup window. (Note: If you do not see an **Add** button, click the **Switch to Advanced Mode** button.)

- a. If you want to use a bank account associated with a different LawPay Account, select that LawPay account in the **LawPay Account** field and proceed to step b. If the other LawPay account is not present, you will need to enable it using the following steps:
  - i. Click the **Add new LawPay account** link.
  - ii. A LawPay window will be displayed. Enter the email address and password assigned to the new LawPay account and click the **Sign In** button.
  - iii. Click the **Authorize** button to authorize Tabs3 Billing to connect to LawPay.
  - iv. You may be prompted for a security code, which will be sent to the specified email address. Enter the security code and click **OK**.
  - v. Click the **Authorize** button to authorize Tabs3 Billing to connect to LawPay.
- b. In the **Use For** field, select **Timekeeper**. A Timekeeper Lookup window will be displayed. Select the timekeeper you want to associate with a LawPay bank account and click **OK**.
- c. In the **Bank Account** field, select the LawPay bank account you want to link to the selected timekeeper.
- d. Click **OK** to close the window.

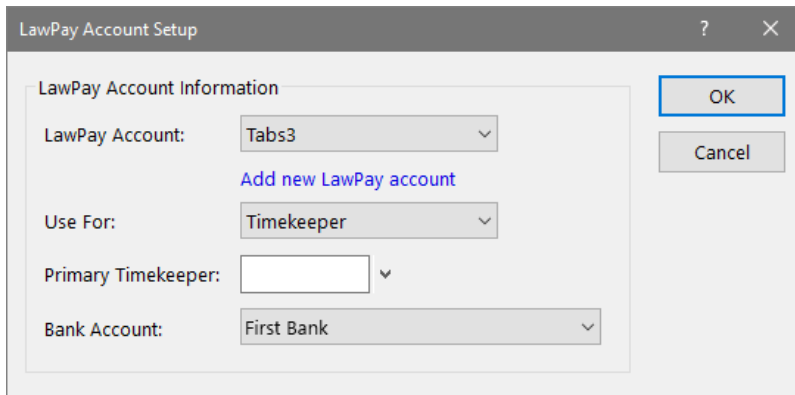

Figure 3, LawPay Account Setup Window (Timekeeper)

5. Save and close the Tabs3 Customization window.

## Configuring LawPay Integration in TAS

Once LawPay Integration has been enabled in TAS, you can process credit card trust deposits electronically.

► **To enable LawPay Integration in TAS**

1. Have all users exit the software.
2. From TAS, select **Utilities | Customization**.
3. Click the **LawPay** tab.
4. Click the **Enable LawPay** button.
5. A LawPay window will be displayed.
  - a. Enter the email address and password assigned to your LawPay account and click the **Sign In** button. If you do not have a LawPay account, visit [Tabs3.com/LawPay](https://Tabs3.com/LawPay) for information on obtaining one.
  - b. If you are enabling LawPay for the first time, you will be prompted for a security code, which will be sent to the specified email address. Enter the security code and click **OK**.
  - c. Click the **Authorize** button to authorize Tabs3 TAS to connect to LawPay.
6. A LawPay Account Setup window will be displayed.
  - a. Select the TAS bank account you want to configure for electronic deposits in the **Bank Account** field.
  - b. In the **LawPay Bank Account** field, select the LawPay bank account you want to link to the selected trust bank account.
  - c. Click **OK** to close the LawPay Account Setup window.
7. Click the  button to save customization changes.

## Configuring Additional LawPay Accounts

If you have multiple trust bank accounts configured in TAS, you must link them to LawPay bank accounts in order to process credit card deposits electronically using LawPay.

► **To link a LawPay bank account to a trust bank account.**

1. Have all users exit the software.
2. From TAS, select **Utilities | Customization**.
3. Click the **LawPay** tab.
4. Click the **Add** button to open the LawPay Account Setup window.
  - a. If you want to use a bank account associated with a different LawPay Account, select that LawPay account in the **LawPay Account** field and proceed to step b. If the other LawPay account is not present, you will need to enable it using the following steps:

- i. Click the **Add new LawPay account** link.
  - ii. A LawPay window will be displayed. Enter the email address and password assigned to the new LawPay account and click the **Sign In** button.
  - iii. Click the **Authorize** button to authorize Tabs3 Billing to connect to LawPay.
  - iv. You may be prompted for a security code, which will be sent to the specified email address. Enter the security code and click **OK**.
- b. In the **Bank Account** field, select the trust bank account you want to associate with a LawPay bank account..
  - c. In the **LawPay Bank Account** field, select the LawPay bank account you want to link to the selected trust bank account.
  - d. Click **OK** to close the window.

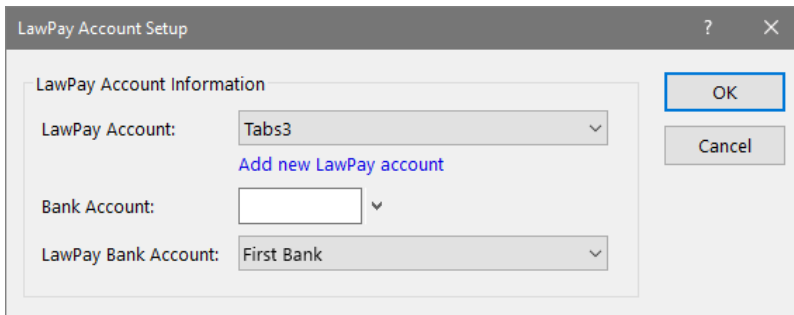

Figure 4, LawPay Account Setup Window (TAS)

5. Save and close the TAS Customization window.

## Electronic Transactions

Integration with LawPay provides electronic processing of credit card and eCheck transactions for payments and client funds deposits in Tabs3 Billing as well as credit card transactions for trust account deposits in Tabs3 Trust Accounting Software (TAS).

### Sending Payment Links with Email Statements

The easiest and most secure method to receive credit card and eCheck payments from LawPay is to include payment links with your Email Statements. These links are inserted into the email message that accompanies the statement, and open a LawPay payment page in the recipient's web browser.

Upon receipt of the email, clients can pay their statement directly via either credit card or eCheck. This eliminates the need for your firm to handle sensitive payment information, reducing your potential liability regarding fraudulent payments.

Once the client has made a payment using a payment link, it can be imported into Tabs3 using the Import Online Payments utility (**Maintenance | Integration | Import Online Payments**).

LawPay payment links are valid for up to 90 days, and clients can make multiple partial payments using the same link until the full statement balance is paid.

For more information on configuring and importing payment links in Tabs3, see KB Article [R11767](#), "Using the Tabs3 Payment Link."

## Adding and Managing LawPay Payment Methods

Once LawPay integration has been configured, you can add payment methods for individual clients. Payment methods are linked to client contacts, which means that all matters that share the same client contact have access to any payment methods that have been added. Payment methods can be added from the Client Information, Payment Entry, and Client Funds Entry windows in Tabs3 as well as the Trust Transaction Entry window in TAS.

### ► To add a new LawPay Payment Method from the Client Information window in Tabs3

1. Open the Client Information Window (**File | Open | Client**), and select the client for whom a new payment method is being added.
2. Click the **LawPay** tab, and then click the **Manage LawPay Payment Methods** button.
3. Click the **New** button to open the Add LawPay Payment Method window.
4. Select **Credit Card** or **eCheck**.
5. Fill in the appropriate fields for the type of payment method you selected. See the [\*\*Credit Card Fields\*\*](#) section (page 11) or the [\*\*eCheck Fields\*\*](#) section (page 12) for information on the fields shown for each payment type. Alternatively, if the client is paying with a credit or debit card and you have a compatible card reader, click the **SWIPE CARD** link and swipe the card to automatically populate the fields.
6. Once you have finished entering the new payment method, click the **Continue** button.
7. Close the Manage LawPay Payment Methods window, and then close the Client Information window.

### ► To add a new LawPay Payment Method from a transaction entry window in Tabs3 or TAS

1. Open the transaction entry window for the type of transaction you want to create:
  - **Payment:** Tabs3 (**File | Open | Payment**).
  - **Client Funds:** Tabs3 (**File | Open | Client Funds**).
  - **Trust:** TAS (**File | Open | Transaction**).
2. Select the client for whom a payment or deposit is being made.
3. Depending on whether the client has any existing payment methods, one of two links will be displayed to the right of the **Receipt Type** field (Payment) or below the **Type** field (Client Funds / Trust Transaction):
  - Click the **Add LawPay Payment Method** link to open the Add LawPay Payment Method window.
  - Click the **Manage LawPay Payment Methods** link and then click the **New** button to open the Add LawPay Payment Method window.

4. Select **Credit Card** or **eCheck** (Tabs3 Billing only).
5. Fill in the appropriate fields for the type of payment method you selected. See the **Credit Card Fields** section (page 11) or the **eCheck Fields** section (page 12) for information on the fields shown for each payment type. Alternatively, if the client is paying with a credit or debit card and you have a compatible card reader, click the **SWIPE CARD** link and swipe the card to automatically populate the fields.
6. Once you have finished entering the new payment method, click the **Continue** button to return to the transaction entry window.
7. The new payment method will be selected in the **Receipt Type** or **Type** field.

## Credit Card Fields

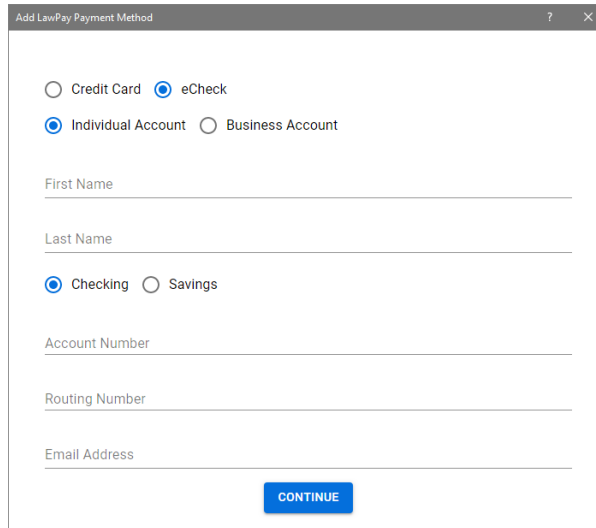

Figure 6, LawPay Credit Card Entry

**Note:** If you have a compatible card reader, click the **SWIPE CARD** link to input the card information via the card reader. You must manually enter a value in the **CVV** and **Zip Code** fields. You must also fill in the **Email Address** field in order for the client to receive an emailed receipt from LawPay.

<b>Cardholder Name</b>	The name on the credit card.
<b>Credit Card</b>	The full credit card number. Do not enter dashes.
<b>CVV</b>	The three or four digit code typically found on the signature block on the back of the card.
<b>Expiration Month</b>	The month the card will expire in MM format.

- Expiration Year** The year the card will expire in YYYY format.
- Zip Code** The zip code of the billing address associated with the card.
- Email Address** The email address where the client wants an optional automatic receipt to be emailed.

## eCheck Fields

The screenshot shows a web form titled "Add LawPay Payment Method". At the top, there are radio buttons for "Credit Card" and "eCheck", with "eCheck" selected. Below this are radio buttons for "Individual Account" and "Business Account", with "Individual Account" selected. The form includes several text input fields: "First Name", "Last Name", "Account Number", "Routing Number", and "Email Address". At the bottom, there is a blue "CONTINUE" button.

Figure 7, LawPay Credit Card Entry

- Individual Account/  
Business Account** Select whether the bank account is an individual or business bank account.

**Note:** This option determines whether the **First Name** and **Last Name** or **Business Name** fields are displayed.

- First Name** Enter the first name of the individual associated with the bank account.

- Last Name** Enter the last name of the individual associated with the bank account.

**Note:** The **First Name** and **Last Name** fields are only displayed if **Individual Account** is selected.

**Business Name**

Enter the name of the business associated with the bank account.

**Note:** This field is only displayed if **Business Account** is selected.

**Checking/Savings**

Select the option to specify a **Checking Account** or **Savings Account**.

**Account Number**

The account number of the account, which must be 17 digits or less. The account number is typically shown to the right of the routing number on a check or deposit slip.

**Routing Number**

The routing number of the account, which must be 9 digits. The routing number is typically shown in the bottom left of a check or deposit slip.

**Email Address**

The email address where the client wants an optional automatic receipt to be emailed.

## Tabs3 Payment

When LawPay integration is enabled, payments entered with a LawPay payment method selected in the **Receipt Type** field will automatically initiate an electronic transaction when saved.

► **To process a payment using a credit card or eCheck**

1. In Tabs3, open the Payment window (**File | Open | Payment**).
2. Enter the payment as you normally would.
3. Select an existing LawPay payment method in the **Receipt Type** field, or **add a new payment method** (page 10).

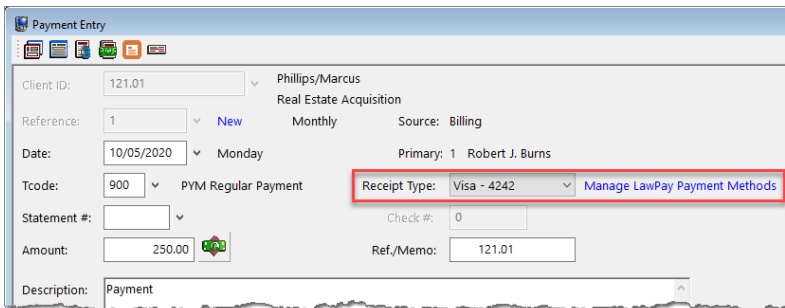

Figure 8, Tabs3 Payment Entry

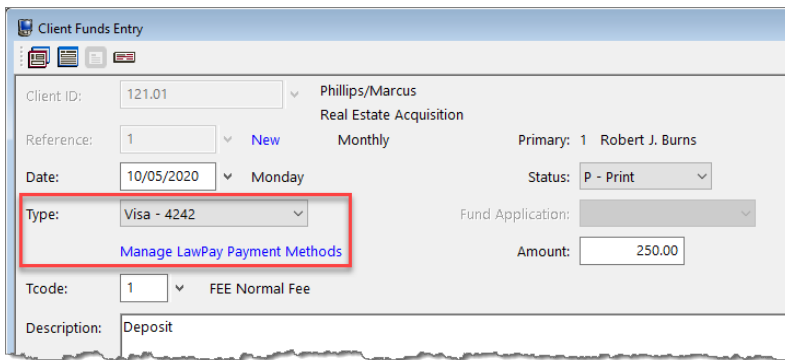

4. Press Ctrl+S to save the transaction. Click **Yes** to confirm that you want to process the payment electronically. (Clicking **No** will return to the Payment Entry window without saving the payment.)

## Tabs3 Client Funds Deposit

When LawPay integration is enabled, client funds transactions entered with a LawPay payment method selected in the **Type** field will automatically initiate an electronic transaction when saved.

### ► To process a client funds deposit using a credit card or eCheck

1. In Tabs3, open the Client Funds window (**File | Open | Client Funds**).
2. Enter the deposit as you normally would.
3. Select an existing LawPay payment method in the **Type** field, or [add a new payment method](#) (page 10).

The screenshot shows the 'Client Funds Entry' window in Tabs3. The 'Type' dropdown menu is highlighted with a red box and contains the text 'Visa - 4242'. Below this dropdown is a blue link that says 'Manage LawPay Payment Methods'. Other fields in the window include 'Client ID: 121.01', 'Reference: 1', 'Date: 10/05/2020', 'Amount: 250.00', and 'Description: Deposit'. The window title is 'Client Funds Entry' and it has a standard Windows-style toolbar.

Figure 9, Tabs3 Client Funds Entry

4. Press Ctrl+S to save the deposit. Click **Yes** to confirm that you want to process the deposit electronically. (Clicking **No** will return to the Client Funds Entry window without saving the deposit.)

## TAS Trust Deposit

When LawPay integration is enabled, trust transactions entered with a LawPay payment method selected in the **Type** field will automatically initiate an electronic transaction when saved.

### ► To process a trust deposit using a credit card

1. In TAS, open the Trust Transaction window (**File | Open | Transaction**).
2. Enter the deposit as you normally would.

3. Select an existing LawPay payment method in the **Type** field, or **add a new payment method** (page 10).

The screenshot shows the 'Trust Transaction Entry' window. The 'Type' field is set to 'Visa - 4242' and is highlighted with a red box. Below the 'Type' field is a link that says 'Manage LawPay Payment Methods'. Other fields include 'Trust ID: 121.01', 'Bank #: 1', 'Reference: 1', 'Date: 10/05/2020', 'Amount: 250.00', and 'Balance: 250.00'. The window also displays 'Phillips/Marcus Real Estate Acquisition'.

Figure 10, TAS Trust Transaction Entry

4. Press Ctrl+S to save the transaction. Click **Yes** to confirm that you want to process the deposit electronically. (Clicking **No** will return to the Trust Transaction Entry window without saving the deposit.)

## Error Messages & Troubleshooting

Detailed information regarding error messages or rejections when a transaction is submitted to LawPay can be found in our Knowledge Base at:

[support.Tabs3.com](https://support.tabs3.com)

Article [R11827](#), "LawPay Error Messages and Troubleshooting," provides information and troubleshooting steps for messages related to credit card processing. Tabs3 does not provide support for credit card rejections.

If you need assistance with correcting errors, please contact LawPay Technical Support by phone at 800-459-5798, by email at [support@lawpay.com](mailto:support@lawpay.com), or via chat at [support.lawpay.com](https://support.lawpay.com).

# Credit and Void Transactions

In the event you need to delete or adjust a transaction, Tabs3 and TAS will automatically attempt to issue a credit or void through LawPay for the associated credit card or eCheck charge.

## Issuing a Credit/Void in Tabs3

LawPay payments or client funds deposits that are deleted or adjusted in Tabs3 can attempt to void or credit the associated transactions in the LawPay system. The Payment Adjustment program is used to reverse or refund the payment in Tabs3 (**Maintenance | Transaction Related | Payment Adjustment**).

### ► Credit/Void a Work-in-Process LawPay Payment Transaction

1. Open the Payment Entry window (**File | Open | Payment**).
2. Select the payment transaction associated with the LawPay transaction. (*Note that only work-in-process payments are available to be credited/voided in this manner.*)
3. Click the  button to delete the payment transaction. You will be prompted to confirm that you want to reverse the LawPay transaction. Click **Yes** to proceed.

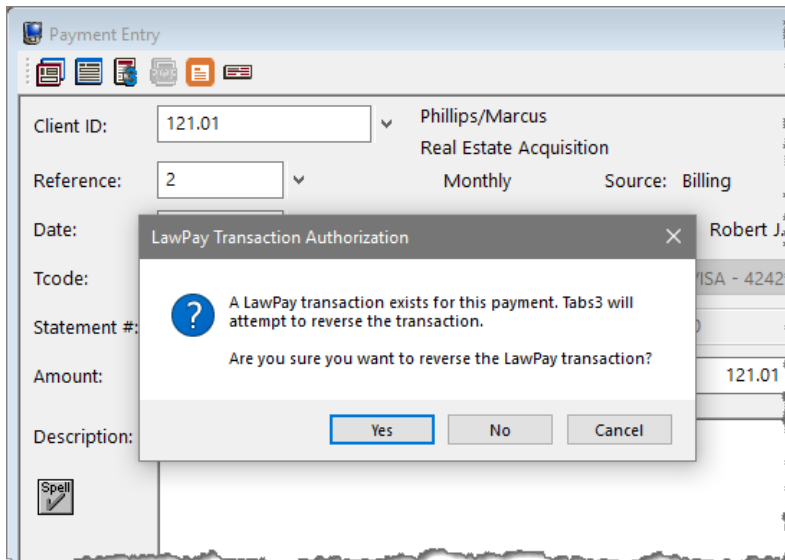

Figure 11, Deleting a Payment Entry

► **Credit/Void an Archived Credit Card Payment Transaction**

1. Open the Payment Adjustment program (**Maintenance | Transaction Related | Payment Adjustment**).
2. Select the payment transaction associated with the LawPay transaction.
3. Select **Reversal** (crediting/voiding the entire amount of the payment) or **Refund** (crediting/voiding an unallocated portion of the payment).
4. Select a **Date of Adjustment** and **Adjustment Amount** (refund only) for the Tabs3 payment. *(Note that this date is not used for the date of the credit on LawPay. The current system date is used.)*
5. Click **OK** to perform the adjustment/credit. You will be prompted to confirm that you want to reverse the LawPay transaction. Click **Yes** to proceed.

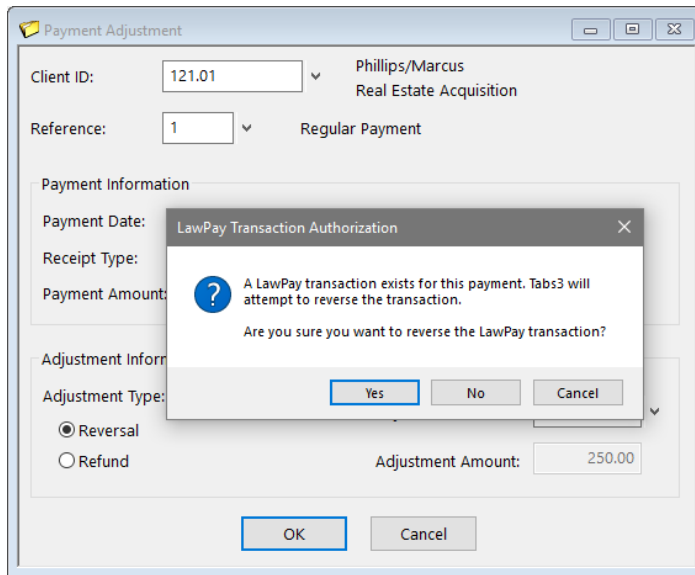

Figure 12, Tabs3 Payment Adjustment

► **Credit/Void a LawPay Client Funds Deposit**

1. Open the Client Funds Entry window (**File | Open | Client Funds**).
2. Select the client funds transaction associated with the credit card transaction. *(Note that only work-in-process client funds transactions are available to be credited/voided in this manner.)*
3. Click the  button to delete the client funds transaction. You will be prompted to confirm that you want to reverse the LawPay transaction. Click **Yes** to delete the transaction and

reverse the LawPay transaction. Click **No** to delete the transaction without reversing the LawPay transaction. Click **Cancel** to return to the Client Funds Entry window without deleting the transaction.

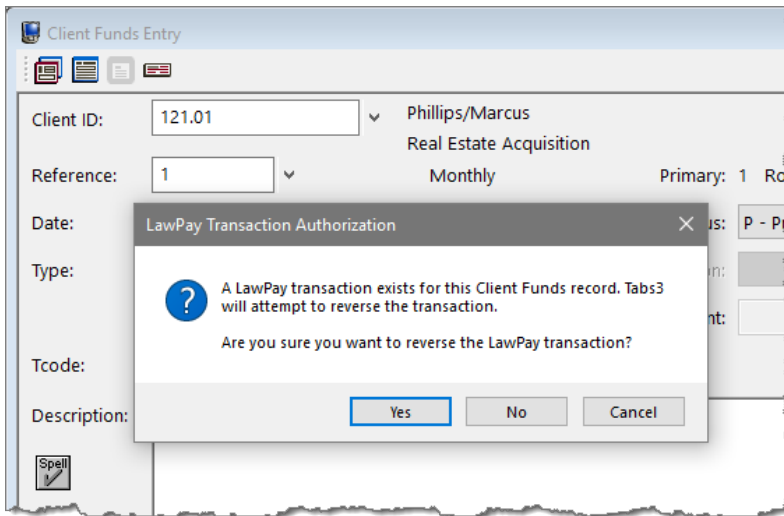

Figure 13, Deleting a Client Funds Deposit

## Issuing a Credit/Void in TAS

LawPay trust deposits that are deleted in TAS can attempt to void or credit the associated transactions in the LawPay system.

### ► Credit/Void a LawPay Trust Deposit

1. Open the Trust Transaction Entry window (**File | Open | Transaction**).
2. Select the trust transaction associated with the LawPay transaction.
3. Click the  button to delete the trust transaction. You will be prompted to confirm that you want to reverse the LawPay transaction. Click **Yes** to proceed.

Figure 14, Deleting a Trust Deposit

## Voids vs. Credits

Tabs3 attempts to void a credit card transaction first. Normally, a void can only be processed the same business day. If a credit card transaction is voided, the transaction will appear on LawPay reports with a zero amount; however, the Tabs3 Credit Card Authorization List will show the original transaction (with the original amount) and the void transaction (with a negative amount).

If a credit card transaction cannot be voided, Tabs3 will then attempt to credit the transaction. Credit card transactions can normally be credited for up to 180 days on the LawPay system. After that time, Tabs3 may not be able to process the transaction, and an error will be displayed. In this case, the transaction will not be adjusted, and manual adjustments may be required. After this time, it is recommended that a check is processed for the credit, either manually or using Tabs3 Accounts Payable.

One important difference between voids and credits is that voids always reverse the entire amount of the transaction, whereas a credit can be for any portion of the original transaction. This is generally not a concern as credits for a portion of the transaction only occur when issuing a refund in Tabs3, which typically occurs after the window for issuing a void has passed. However, if a refund is processed in Tabs3 and a void is issued by LawPay, a message will be displayed after the void is processed (Figure 15), and it will be necessary to reverse the original payment entirely and reenter the payment with the correct amount.

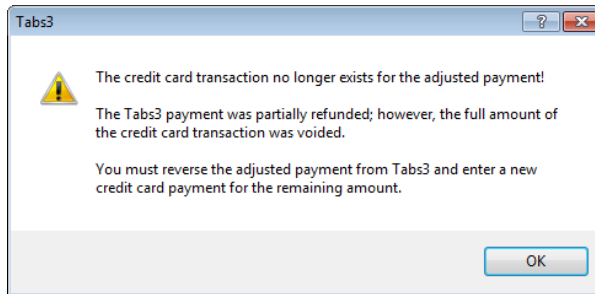

Figure 15, Tabs3 payment adjustment message

# Credit Card Reports

The credit card receipts and Credit Card Authorization List report can be accessed via Tabs3 or TAS.

The Credit Card Receipt displays the amount and general information about the credit card transaction, including the card type and last four digits of the credit card number. No secure credit card information is shown on this receipt. A copy of the receipt may be presented to the client as proof of payment.

## Definitions

**Date**

Date the receipt was printed.

**Client/Trust ID**

Client ID (Tabs3) or Trust Account ID and Bank Account (TAS), Name, and Work Description.

**Note:** Deleting a client or trust account does not delete any transaction records processed by LawPay or ProPay. The Credit Card Authorization List (*page 24*) will report the original Client ID or Trust ID, and note that the client or trust account was deleted.

**Statement # (Payment Only)**

Statement number the payment applies to, if selected.

**Receipt Type**

The card type followed by the last four digits of the account number.

- VS - Visa
- MC - MasterCard
- DS - Discover
- AE - American Express
- EC - eCheck

<b>Reference</b>	The reference number assigned to the transaction in Tabs3 or TAS.
<b>Received By</b>	The user who processed the transaction. <div data-bbox="579 282 1197 499" style="border: 1px solid red; padding: 5px;"><b>Note:</b> For transactions that were created via the Import Online Payments program (<b>Utilities   Maintenance   Import Online Payments</b>), the User ID shown is that of the user who initiated the import (either by being the first person to open Tabs3 that day, or by opening the Import Online Payments program).</div>
<b>Date</b>	Date of the payment, client funds deposit, or trust transaction.
<b>Time</b>	Time of the payment, client funds deposit, or trust transaction.
<b>Description</b>	Description of the payment, client funds deposit, or trust transaction.
<b>Cardholder Name</b>	The name of the cardholder as it was entered on the <b>Add Card</b> page of the Credit Card Authorization window (or read by the card reader, if used). This field defaults to the <b>Contact Name</b> assigned to the client in the <b>Client Contact</b> , if it is not overwritten by the user or the card reader.
<b>Reference #</b>	LawPay or ProPay reference number.
<b>Amount (USD)</b>	Amount charged to the credit card.

**Menu** [Reports | Credit Card | Credit Card Authorization List](#)

**Home** [All Actions | Reports | Credit Card | Credit Card Authorization List](#)

The Credit Card Authorization List is used to print a list of credit card transactions authorized via Tabs3 or TAS for a specified time period. You can run a list with charges, voids, credits, or any combination thereof. Items are sorted based on the specified **1st Sort Order** and **2nd Sort Order**. Three reports are shown. The first report includes the default columns, whereas the second report includes all possible columns. The third report is the Trust Credit Card Authorization List with the default columns.

## Definitions

- Date** The date the report was printed.
- From/Thru** The beginning and ending dates selected for the report.
- Merchant ID** The Merchant ID with which the transaction was processed is printed if the report is printed in Merchant ID sort order. The Merchant ID is the default sort order.

<b>(Client/Trust ID)</b>	The Client/Trust ID and Client Name for which the transaction was processed is printed if the report is printed in Client/Trust ID sort order. If a credit card transaction exists for a client/trust account that was deleted, that transaction is retained and will print under the original Client/Trust ID and the Client Name "(Client/Trust Account Deleted)".
<b>Trans Status</b>	Status field of the transaction. (Deleted, Processed/WIP, or ARCH)
<b>Auth Date</b>	The date the credit card transaction was authorized.
<b>Time</b>	The time the credit card transaction was authorized.
<b>Client/Trust ID</b>	Client or Trust Account for which the transaction was processed.
<b>Source (Tabs3 only)</b>	The data entry program where the credit card transaction was entered. (Pymt or Fund)
<b>Ref#</b>	The the reference number generated by the LawPay or ProPay processing system.
<b>Merchant ID</b>	The Merchant ID the credit card transaction was processed with.
<b>Card Info</b>	A two digit card type code (VS-Visa, MC-MasterCard, DS-Discover, AE-American Express, EC-eCheck) followed by the last four digits of the account number.
<b>Cardholder Name</b>	The name of the cardholder as it was entered on the <b>Add Card</b> page of the Credit Card Authorization window (or read by the card reader, if used). This field defaults to the <b>Contact Name</b> assigned to the client in the <b>Client Contact</b> , if it is not overwritten by the user or the card reader.
<b>Type</b>	Transaction type. Charge, Credit, or Void.
<b>Amount</b>	The amount of the credit card transaction.
<b>User ID</b>	The user who processed the transaction.

**Note:** For transactions that were created via the Import Online Payments program (**Utilities | Maintenance | Import Online Payments**), the User ID shown is that of the user who initiated the import (either by being the first person to open Tabs3 that day, or by opening the Import Online Payments program).
