Tabs3 Announces New Integration with Trumpet, Inc.

Symphony OCR® provides law firms with text-searchable documents within PracticeMaster

Lincoln, NE – January 22, 2016 – Software Technology, Inc., the maker of Tabs3 and PracticeMaster, announced a new partnership with Trumpet, Inc., the maker of Symphony OCR. In the latest update to Tabs3 software, clients can use Symphony OCR to add an OCR layer to any new documents managed by PracticeMaster. Symphony OCR identifies any saved document that is not text-searchable, and automatically creates an OCR layer that makes the text in the document searchable. Symphony OCR will also process all existing saved documents. Symphony OCR gives users the confidence of knowing that all documents will be found using PracticeMaster’s text search functionality.

“Teaming with Trumpet extends our document search functionality and provides law firms with an intuitive and easy-to-use way to make sure all PDFs are searchable,” said Dan Berlin, President of Software Technology, Inc. “For over 35 years, we have worked hard to develop reliable, quality software for law firms and to ensure Tabs3 clients can organize their firm’s documents and perform conflict of interest searches easily.”

“Symphony OCR makes it easier to find exactly what you need when you need it. Without OCR, most scanned documents are not actually text-searchable, as the document is simply saved as an image. Symphony OCR transforms it into a fully text-searchable document,” said Robin Houston, Director of Sales and Marketing at Trumpet, Inc. “Integrating Symphony OCR into PracticeMaster allows law firms to reach new heights of efficiency and productivity.”

PracticeMaster’s integration with Symphony OCR is included in Version 17, as well as the newly released Version 18! Version 18 also includes new ways to save time through enhanced reconciliation, bank transaction import capabilities, and improved trust accounting features. The reconciliation process in Version 18 has been completely redesigned to have fewer steps and make any discrepancies easier to understand, helping clients reconcile their accounts faster. Further, clients can save time and prevent the possibility of human error by importing transactions from their bank’s website directly into Tabs3 General Ledger and Trust Accounting software. Finally, with the improvements to Tabs3 Trust Accounting, it’s even easier to keep clients’ trust account balances in check.

About Software Technology, Inc.

Software Technology, Inc. (STI), the maker of Tabs3 and PracticeMaster software, has been at the forefront of developing software for law firms for over 35 years. Tabs3 is one of the most widely used legal-specific time and billing products in the United States and has been an industry leader since its introduction in 1979. Tabs3 is designed to seamlessly integrate with PracticeMaster, a leader in practice management software. Among its many features, PracticeMaster provides an easy way for firms to create a firm-wide calendar, search for conflicts of interest, organize case and contact information, and manage email and documents. For more information, call (402) 419-2200, email sales@tabs3.com, or visit Tabs3.com.

About Trumpet, Inc.

Forward-thinking and always focused on making life better for our clients, Trumpet has devoted nearly two decades to developing and implementing document management and workflow automation tools for the financial and legal markets. Our purpose is simple: to help people enjoy the way they work.

As a trusted technology partner in the legal space, Trumpet's solutions are designed to "just work". From Symphony OCR® (optical character recognition) to automated filing and publishing, firms save time and effort by creating technology that works the way they do.
